

UTILITY PATENT APPLICATION
GE-07053

WHAT IS CLAIMED IS:

1. A method for operating a track management system, said method comprising the steps of:

- 5 providing a COTS application server capable of receiving data in a Java Two Enterprise Edition (J2EE) compliant protocol;
generating data representing target information, and communicating said data to said COTS application server in the form of a
10 Java Two Enterprise Edition (J2EE) compliant protocol;
providing a plurality of computer processing arrangements, each of which is capable of processing Java;
15 in said application server, processing said J2EE compliant data with a plurality of Enterprise Java Beans software components, establishing those of said computer processing arrangements in which said data is
20 processed;
providing said J2EE compliant data to the selected ones of said computer processing arrangements, for thereby generating processed data; and
25 providing said processed data to a user.

2. A method for operating a track management system, said method comprising the steps of:

UTILITY PATENT APPLICATION
GE-07053

5 providing a COTS application server
arrangement capable of receiving data in a Java
Two Enterprise Edition (J2EE) compliant
protocol;

generating data representing target
information, and communicating said data to
10 said COTS application server in the form of a
Java Two Enterprise Edition (J2EE) compliant
protocol;

providing a computer processing
arrangement which is capable of processing J2EE
15 compliant software components;

in said application server
arrangement, processing said J2EE compliant
data with one of (a) an Enterprise Java Bean
software component arrangement and (b) a Corba
20 software component arrangement to establish
those of said computer processing arrangements
in which said data is processed;

providing said J2EE compliant data to
the selected ones of said computer processing
25 arrangements, for thereby generating processed
data; and

providing said processed data to a
user.
